Information about company VBW Engineering

VBW Engineering has been active in the field of air-conditioning for many years. It is a manufacturer of appliances for customised air-conditioning and ventilation of rooms. The company invests into modernity, reliability, inventive ideas, flexibility of production and economic solutions. The products of VBW Engineering have been operating in office blocks, hotels, hospitals, sports objects, banks, production halls, power generating plants, mines, supermarkets, cinema complexes, laboratories, public and private swimming pools, creating optimal microclimate everywhere. The main goal of the activities of VBW Engineering and its representatives in Poland and abroad is to manufacture PRODUCTS that strictly match the expectations, requirements and needs of the user. We have been constantly cooperating with research and scientific centres. This allows us to present the market with specialist solutions, competitive in ideas and quality while applying economical criteria.
